Bachelor's degree in Information Systems at UFSC - Brazil.
7 years of total professional developer experience.
Currently working remotely (USA company) as a full stack developer.
Constantly improving knowledge and learning new technologies.
Curious, agile and objective.

Bairesdev -> Myriad Genetics / Full Stack Developer

January 2022 - Present / USA - Remote

Contributing in several areas of the system, both in frontend and backend. I'm part of the revenue team, and helped to develop an instant payment feature, which was a big milestone for us. The system is very large and serves more than 100 million users. We are very strict with coding patterns and tests.

Tech stack: python, django, react, AWS, backend/front end testing, postgresql, docker, GoCd, datadog, kafka, github actions.

BiomeHub Biotechnologies / Full Stack Developer

February 2021 - December 2021 / Brazil - Remote

Creating new features, improvements and fixes on BiomeHub's main applications. Direct contact with all areas of development (front, back and infra). Added features and functionalities to the system that impacted more than 50M users and helped people during covid-19 pandemic.

Tech stack: django, vuejs, quasar, firebase, postgresql, docker, mongodb, google cloud platform.

Faktual / Full Stack Developer

March 2020 - December 2020 / Germany - Remote

Designed and developed API endpoints with django rest framework; Helped frontend with React; Developed the whole company's website by myself (faktual.de); Build Grafana boards/charts to monitor all the endpoints of the web app, with prometheus and django(as the web app).

Tech Stack: api design, aws, aws lambda, bootstrap, django, docker, jquery, postgresql, python, react, responsive design, typescript.

Caleta Gaming / Back end Developer

September 2019 - February 2020 / Brazil - In-office

Created a complete and responsive dashboard to get and organize the data from all users, all game plays, money and currency indicators, spent/won money, currencies and everything related to the games(casino games).

Tech stack: django, game development, javascript, mysql, python, responsive design

Autonomous / Software developer freelancer

October 2019 - June 2020 / Brazil - Remote

Created lots of websites and blogs; Created web apps; Got WordPress and PHP experience; Deep understanding of FTP clients and all requirements to put a website or web app up and running; SSL keys and certificates; Every site responsive.

Tech stack: bootstrap, devops, django, javascript, jquery, php, python, responsive design, ui, ux, wordpress.

E3C Tecnologia / Back end Developer

April 2018 - July 2019 / Brazil - In-office

It was a big digital signage company with clients all around the world. I did many improvements, features, fixes in the software as a whole. Created a built in lottery app (as part of the software) with web scraping; Created login page for the new version of website, from scratch.

Tech stack: backbone.js, bootstrap, django, javascript, python, responsive design, vuejs.

DesignLab (UFSC) / Mobile/react native Intern

December 2017 - April 2018 / Brazil - In-office

Scholarship at DesignLab (UFSC) working in the project "Desafio Saúde" as a react native developer.

Tech stack: React native, javascript, css3, html5.

AgileProcess / Back end Developer

January 2017 - November 2017 / Brazil - In-office

Helped with API documentation and design; Created endpoints with django; Minor Frontend related fixes; Specific database updates and selects for clients.

Tech stack: django, javascript, mysql, python.

Ayty Tech / PMO(Project Management Office) assistant

June 2015 - January 2016 / Brazil - In-office

Not working with software development. Conducted meetings for the current status of projects and tickets; Built and edited lots of excel spreadsheets with formulas, DB connection and dynamic tables; Understood the company's processes and had direct contact with DB and .NET teams.
